Summary

Software Developer Intern & Global Top 100 Talent

Ranked **71st/2.1M globally** in Unstop Engineering Live. Passionate engineer with a proven track record of building scalable systems, including a **Smart Campus SaaS platform** and **StockSense AI**. Proficient in **React, Python and Docker**, with a deep interest in distributed systems and product ownership. Eager to bring a founder-mentality and rapid execution skills to AlgoUniversity's engineering team.

Experience

Adeptstation

October 2025 – Present

Software Developer Intern

Vadodara, Gujarat

- Delivered scalable full-stack features using Laravel, React.js, and PostgreSQL supporting active client deployments.
- Containerized dev environments with Docker, improving onboarding efficiency and deployment consistency.

Projects

Smart Campus Utility Hub | *JavaScript, React.js, Node.js, PostgreSQL*

- Developed a comprehensive web-based campus management system featuring student and faculty portals.
- Automated academic scheduling algorithms, cutting manual administrative workload by 50–70% and eliminating conflicts.
- Integrated a placement tracking module handling company records and student participation.

StockSense AI | *React.js, TypeScript, Python, FastAPI, ETL*

- Spearheaded the development of StockSense, an AI-powered platform providing real-time insights and automated trade signals.
- Designed ETL pipelines processing thousands of daily data points; implemented Regression/Sentiment models to reduce latency by **~25%**.
- Built an NLP engine to analyze **100+** financial news articles/day, enhancing prediction accuracy and decision reliability.

Banking Management System | *Java, AWT, Swing*

- Built a modular banking system managing customer accounts, transactions, and loan operations using Java OOP fundamentals.
- Implemented event-driven UI workflows and data validation, reducing user-input errors by 40% during testing.

Achievements

Unstop Engineering Live: Global Rank **71** out of 2.1 million+ participants.

LeetCode: Solved 200+ Data Structures and Algorithms problems.

Skills

Languages: Java, C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5/CSS3

Backend: Laravel, FastAPI, Node.js, Express.js, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Tools: Git, GitHub, Docker, Postman, AWS (EC2/S3)

Education

The Maharaja Sayajirao University

June 2023 – June 2027 (Expected)

Bachelor of Engineering in Computer Science

Vadodara, Gujarat

Leadership

Code Vimarsh

Sep 2024 – Present

Secretary

- Organized coding events, hackathons, and DSA competitions for a 300+ member community, ensuring active participation.
- Collaborated with cross-functional student teams to enhance technical culture, mentorship initiatives, and event quality.
